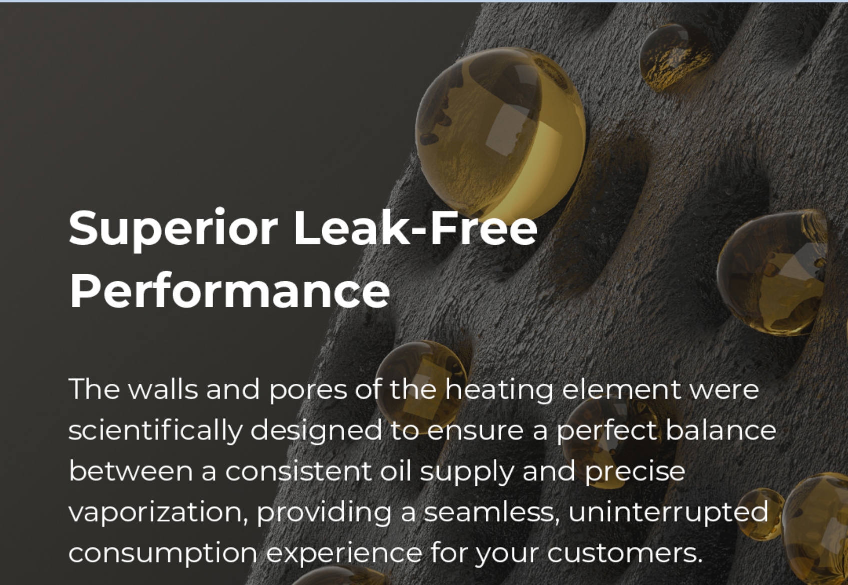
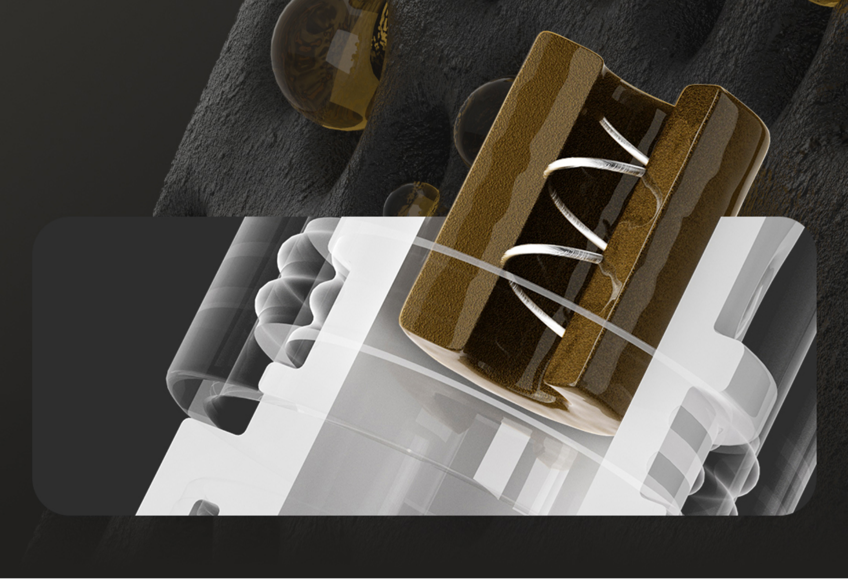
Φ11.0 x 53.9H/65.2H (mm)
Resistance: 1.7Ω
Aperture size: 4 x Φ2mm
Snap-fit mouthpiece
Borosilicate glass body
Ceramic center post



Superior Leak-Free Performance

The walls and pores of the heating element were scientifically designed to ensure a perfect balance between a consistent oil supply and precise vaporization, providing a seamless, uninterrupted consumption experience for your customers.



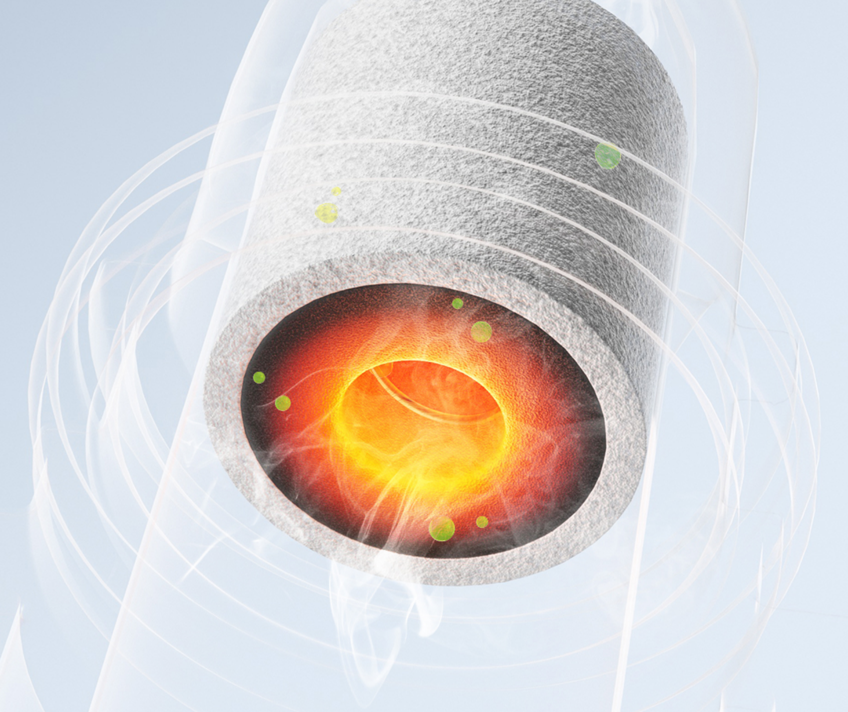
100% Compatibility with All Oils

With its optimized heating element structure, the cartridge ensures total compatibility with all cannabis oils. This compatibility particularly shines when paired with difficult-to-work-with oils like live rosins and liquid diamonds.

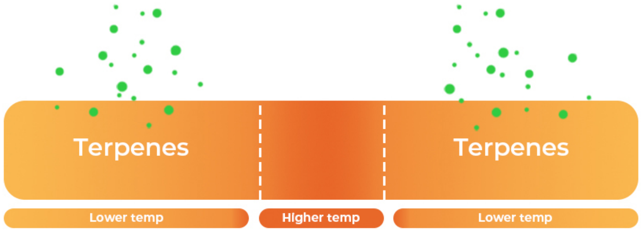
Liquid Diamond
Distillate
Live Rosin
Live Resin

Extremely Flavorful Experience

The EVOMAX heating element comes with improved heat distribution, promoting more effective terpene vaporization and delivering true-to-strain tastes in every inhale.



Heat Distribution & Terpene Vaporization



Safe and Sleek Full Ceramic Design

Upgrade your cartridge to the safer, sleeker Ceramic-EVOMAX. Its full ceramic design eliminates the risk of your oil coming into contact with heavy metals and delivers a hassle-free experience with pure flavor.
