Flex

Flexibility Maximized

Ready For Infinite Variations

Proudly *flex* your Flex in any configuration you desire.

Flex can be customized to fit any oil window shape you specify: square, rectangle, circle, ellipse, or even a star.

Its minimalistic design further enables a wide variety of sophisticated surface finishes that will allow your brand's flair to be the star of the show.

Two Sizes, Four Volumes

Flex was designed with the *flexibility* to house either 0.5ml or 1ml (or 1.5ml/2ml) of oil without having to change the size or shape of its external hardware.* This allows oil brands to expand their product range in a flash and utilize the same packaging for both available sizes.

*Same body size for both 0.5ml and 1ml. Same body size for both 1.5ml and 2ml as well, but different from 0.5ml/1ml size. The internal structure of every size's mouthpiece is different; tank volume must be defined during order placement.

Clog-Free, Worry-Free

Flex is the ideal disposable for anyone looking for a dependable and hassle-free vaping experience. Built with CCELL's cutting-edge dual air vent design, Flex ensures effortless, smooth draws with no clogs and consistent vapor delivery every time.

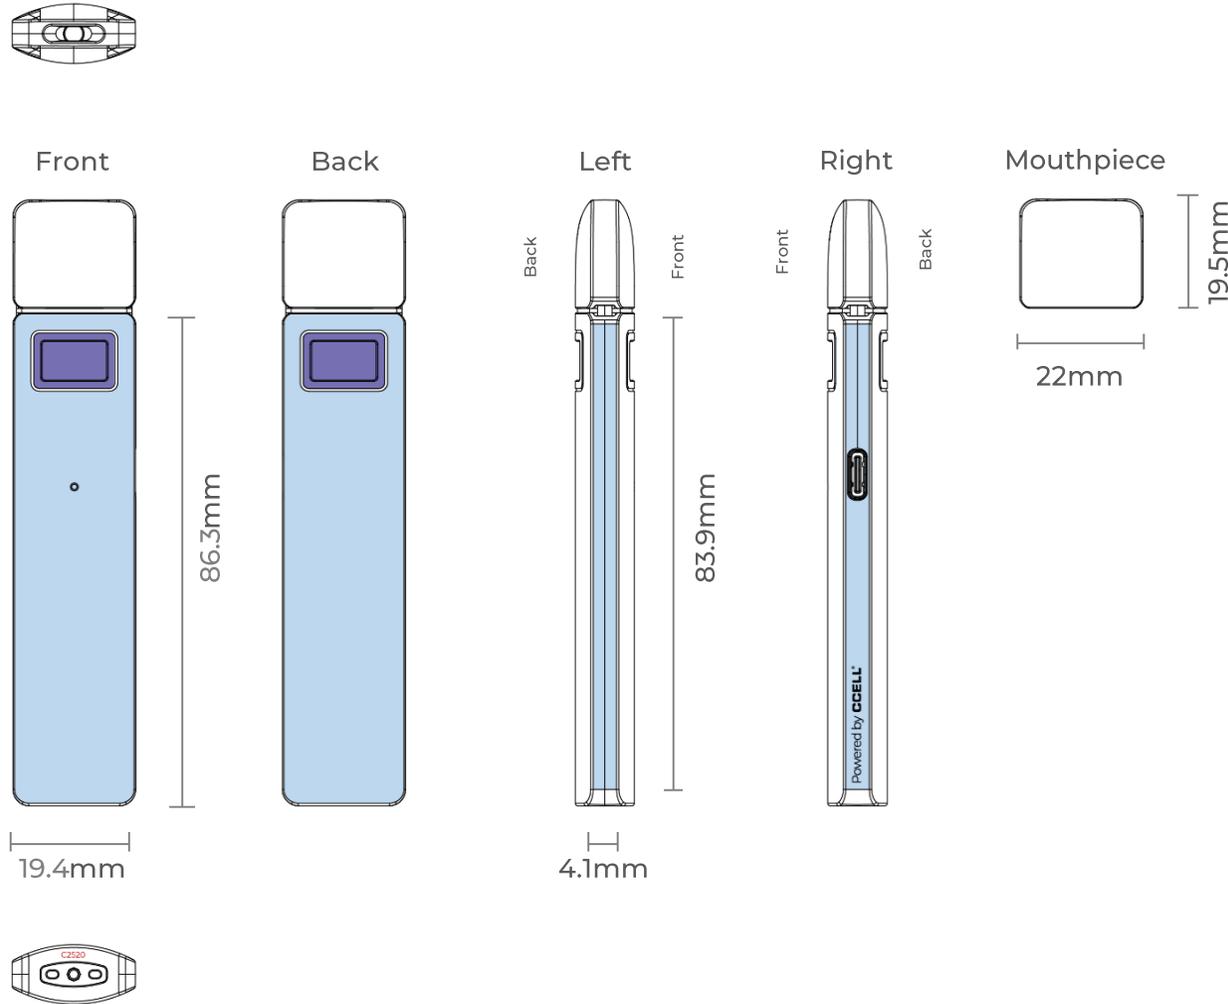

Specs
